# DSCI560: Weekly Report

## Submission

Please submit the following two materials via D2L (Assignment: Weekly report )
1. Monthly report (PDF)
2. Class weekly presentation slide(pptx)

## Weekly repor

The weekly report is a one-page summary of the progress. Your weekly report should discuss: your technical development, evaluations, and results. If your project is planning to develop a user interface such as GUI or Web Application, you should also report its progress. Note that each team will update their one-page tech plan weekly and update the project Gantt chart* accordingly.

*You can add one extra page for the Gannt chart.

## Class presentation

Please prepare the class presentation for your weekly progress using the contents of the weekly report above. In this week, you should present only the latest system development, evaluation, user interface/ dashboard and final product (even if that is not yet completed).
